About Me

My mind was set on the graphic design field from my graduation days unlike most of my friends who pursued a career in business, finance or in the IT industry. I enrolled at a training center in HHPA group of companies. The training covered all aspects of designing & printing, and taught the latest software. The faculty was really supportive & knowledgeable under the supervision of art director. I was placed at ABS later where I started as a graphic designer.

Later for the career development I joined futures group International for a probationary period & transferred to COMPRI-A project of FGI after the completion of probationary period successfully. Our marketing team in the project in general & myself specifically got an appreciation letter by the directors for the outstanding performance & achievements.

My five years of experience taught me that graphic design is about more than just “being pretty” It’s about using images, infographics, illustrations, charts, graphs and layouts to communicate ideas, and sell products or services. I am a person with a decisive and efficient team approach; energetic person and highly organized, analytical thinker with outstanding event management skills.

Awards & Certifications

- Appreciation letter for the outstanding performance - designing & marketing activities.
- Web & graphic design certification.
- Afghan IT Institute (Mashal EDU)
- SQL/Oracle Certification
